Jane Doe

San Francisco, CA | +1 (555) 123-4567 | jane.doe@example.com | linkedin.com/in/janedoe | github.com/janedoe | janedoe.dev

Professional Summary

Full-stack Backend Engineer with 1.5+ years of experience designing scalable microservices in Java, Python, and Node.js. Proficient in LLM orchestration, RAG pipelines, and cloud database optimization.

Skills

Languages: Java, Python, TypeScript, JavaScript, SQL
Frameworks & Backend: Spring Boot, FastAPI, Express, Node.js, Flask
AI & Data: LangChain, OpenAI API, PostgreSQL, Redis, Vector DBs

Work Experience

Tech Innovations Inc. San Francisco, CA
Backend Software Engineer *June 2023 – Present*

- Architected and deployed high-throughput REST APIs handling 2M+ requests per day with 99.9% uptime.
- Integrated LLM-based RAG pipeline using LangChain and pgvector, reducing customer search latency by 45%.
- Optimized PostgreSQL queries and Redis caching layer, cutting p95 response time from 380ms to 95ms.

Projects

SmartResume AI | *Python, Flask, Docker, LaTeX* github.com/janedoe/smart-resume

- Built microservice converting dynamic JSON to ATS-compliant PDFs using isolated pdflatex compiling.
- Implemented token-efficient LLM prompt chaining to optimize resume keywords based on job descriptions.

Education

University of California, Berkeley Berkeley, CA
B.S. in Computer Science *2019 – 2023*
Relevant Coursework: Distributed Systems, Operating Systems, Database Management Systems.

Certifications

- AWS Certified Solutions Architect – Associate
- DeepLearning.AI Generative AI for Software Engineers

Achievements

- Winner, Regional AI Hackathon 2024 (1st place out of 60 teams)
- Published technical article on LLM latency optimizations with 10k+ reads
